Subject Index

Accidental torsion in yielding symmetric structures 98
Analytical model for far-field response spectra with soil amplification effects 263
Analytical procedures for the study of seismic response of reinforced concrete frames 37
Approximate method for dynamic analysis of offshore structures to wave action 120
Assessment of SSI on the longitudinal seismic response of short span bridges 60

Base mat lift-off, time domain BEM-FEM seismic analysis including 195
Behaviour of extended end-plate connections under cyclic loading 15
Boundary conditions, vibration and buckling of plates with mixed 285
Bridges, assessment of SSI on the longitudinal seismic response of short span 60

Consistent predictors and the solution of the piecewise holonomic incremental problem in elasto-plasticity 9
Cooling tower for the THTR powder plant at Schmehausen, FRG, experience with the first dry 146

Deformable structures with water waves, selective reviews of boundary element modelling for the interaction of 269
Design model for semi-rigid connections 88
Directionality and simulation in spatial variation of seismic waves 134
Dynamic response of structures with uncertain damping 2

Effect of axial forces on the performance of links in eccentrically braced frames 106
Elasto-plastic large deformation analysis of thin-walled structures 28
Elasto-plasticity, consistent predictors and the solution of the piecewise holonomic incremental problem in 9
Experience with the first dry cooling tower for the THTR power plant at Schmehausen, FRG 146
Frames, effect of axial forces on the performance of links in eccentrically braced 106
Full-scale measurements of wind-induced acceleration response of Sydney Tower 153

Green's function solution for axisymmetric vibration of flexible liquid-filled storage tanks 49

Lateral torsional stability analysis of large-order space frame structures 235
Loading, behaviour of extended end-plate connections under cyclic 15

Marine hose-string, vertical bending moments and axial forces in a floating 124
Modelling for the interaction of deformable structures with water waves, selective review of boundary element 269
Multistorey concrete buildings design considerations for formwork in 163

Offshore structures to wave action, an approximate method for dynamic analysis of 120

Optimal placement of controllers for seismic structures 254

Plates with mixed boundary conditions, vibration and buckling of 285

Reinforced concrete frames, analytical procedures in the study of seismic response of 37
Response of flexible structures in random seas 277
Response spectra with soil amplification effects, an analytical model for far-field 263
Response spectrum approach for seismic analysis of nonclassically damped structures 173

Scattering of plane SH-waves by underground cavities 215
Seas, response of flexible structures in random 277
Seismic waves, directionality and simulation in spatial variation of 134
Seismic analysis including base mat lift-off, time domain BEM-FEM 195
Seismic analysis of nonclassically damped structures, response spectrum apporach for 173
Seismic response of reinforced concrete frames, analytical procedures in the study of 37
Seismic response of short span bridges, assessment of SSI on the longitudinal 60
Seismic structures, optimal placement of controllers for 254
Seismic waves, directionality and simulation in spatial variation of 134
Selective review of boundary element modelling for the interaction of deformable structures with water waves 269
Simplified response spectrum method for random vibration analysis of flexible base buildings 185
Simulation in spatial variation of seismic waves, directionality and 134
Soil amplification effects, an analytical model for far-field response spectra with 263
Some methods for structural analysis 208
Space frame structures, lateral torsional stability analysis of large order 235
Storage tanks, Green's function solution for axisymmetric vibration of flexible liquid-filled 49
Structural analysis, some methods for 208
Structural systems, a theory of no-tension discretized 227
Structures in random seas, response of flexible 277
Structures with uncertain damping, dynamic response of 2
Symmetric structures, accidental torsion in yielding 98
Systematic and random features of measured pressures on full-scale silo walls 74

Teflon sliders in a modification of the concept of a soft first storey, use of 243
Theory of no-tension discretized structural systems 227
Thin-walled structures, elasto-plastic large deformation analysis of 28
Time domain BEM-FEM seismic analysis including base mat lift-off 195

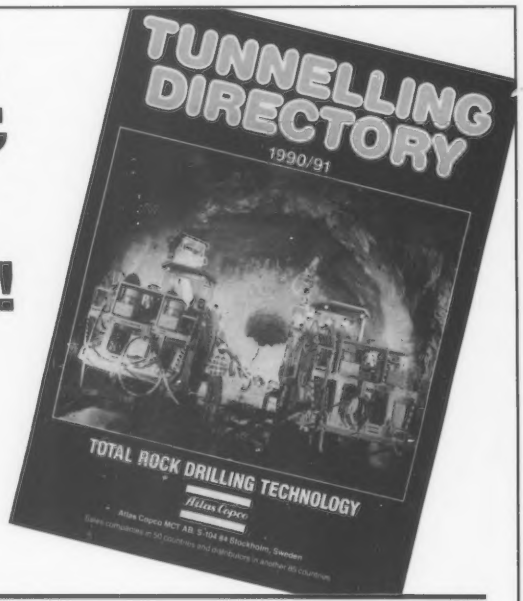
Underground cavities, scattering of plane SH-waves by 215
Use of Teflon sliders in a modification of the concept of a soft first storey 243

Vertical bending moments and axial forces in a floating marine hose-string 124
Vibration analysis of flexible base buildings, a simplified response spectrum method for random 185
Vibration and buckling of plates with mixed boundary conditions 285
Vibration of flexible liquid filled storage tanks, Green's function solution for axisymmetric 49

Wave action, an approximate method for dynamic analysis of offshore structures to 120
Waves, Selective review of boundary modelling for the interaction of deformable structures with water 269
Wind-induced acceleration response of Sydney Tower, full-scale measurements of 153

Yield surface equation for doubly symmetrical sections 114

THE 1990/91 TUNNELLING DIRECTORY IS OUT NOW!



The Tunnelling Directory is the acknowledged reference work on companies involved in every aspect of tunnelling and underground works. The brand-new 1990/91 edition lists over 1,700 companies around the globe: contractors, suppliers of equipment or services, manufacturers and consultants.

The Directory gives you an instant and comprehensive source of information about *every* company: what type of company, what services it provides, which countries it has offices in and full details of telephone, telex, telefax and telegram numbers.

Complete the coupon and return it with your cheque, postal order or international money order for £30 UK or $60 US overseas (this includes postage and packing), or simply fill in your credit card details.

Credit card holders can phone their order on 081 855 7777 **Please allow 28 days for delivery**

Please post to: Tunnelling Directory, Morgan-Grampian House, Calderwood Street, London SE18 6QH

Please send me .....copy/copies of the Tunnelling Directory £30.00 $60.00 overseas

I enclose a cheque/p.o./international money order for .....or please debit my Access, Visa, American Express, Diners Club card:
